PDF Terms of Use and Copyright Notice

The content created by **Genuinely Em** including sewing patterns, images, tutorials, and all other content are protected by the United States and international copyright laws.

This content is meant only for personal use or small business use (max 2 owners/employees). Redistributing the PDF is wrong and illegal. Please respect creators so that we can keep providing patterns and content for you to use. If these TERMS OF USE are not respected legal action will be taken.

What you should NOT DO!

Do not:

- Resell the PDF files, either as-is or altered in any way
- Publicly or privately provide a direct link to the PDF
- Email or share the PDFs with others
- Save these files on a public website or sharing platform (your website, DropBox, Google Drive, etc...) so that other people may access it
- Use the PDF as a link on your website
- Send the PDF to manufacturers for production purposes
- Use any of our images to promote your product, even if you are promoting the finished product

What you CAN DO!

Do:

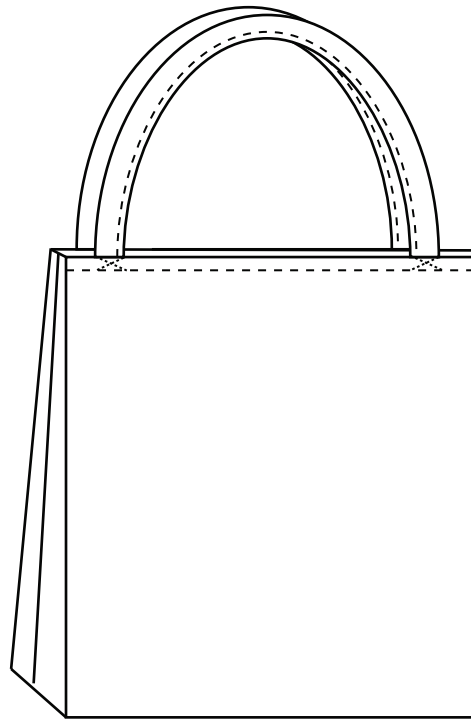

- Post on social media and tag me, **@genuinelyemstyle**
- Save the files to your computer or your personal online drives like Google drive
- Print the PDFs off for personal use
- Use the pattern to make swimsuits to sell, but never selling the actual PDF pattern
- Give credit where possible
- Ask me if you're unsure if you can use the PDFs in your situation, or if you have any other questions!

Definition of Business Use

- I allow my patterns to be used by individuals to produce finished pieces for a small-scale business. This does not include selling the PDF pattern directly.
- A small-scale business is defined as a retail business selling finished products, where there are a maximum of 2 owners/employees, and in which manufacturing is done in-house. If this does not describe your business, you may only use our products for personal use.
- If your business uses a manufacturer then these patterns cannot be used or shared with them.

Finished Pattern

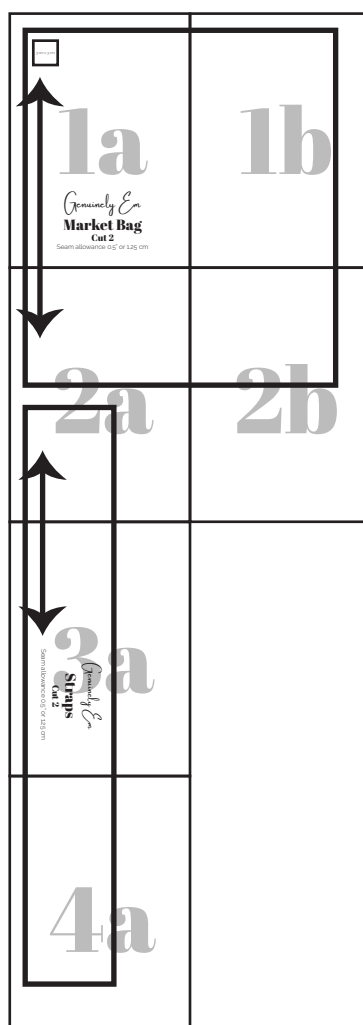

This design has a 1.25 cm seam allowance.
It has 2 straps and some depth to help you fit more items inside.

Fabric Yardage: $\frac{3}{4}$ meters

Pattern Layout

Print the Pattern and Tape it Together

A4 Size Layout

When you go to print, make sure that your printer is set to print at **100%** or select **“do not scale”**. Check if everything is to size by printing the first page and **measuring the test square**.

Let's Begin

Materials

Fabric

- A woven fabric is a great choice for this bag.
The thicker the fabric the more it will be able to stand up on its own.

- You will need **3/4 meters** of fabric.

Thread

- Gutermann is my go-to thread

Pattern

- Print and tape together, then cut your fabric.

Sewing

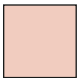

Step 01 • Sew 3 Sides of the Bag

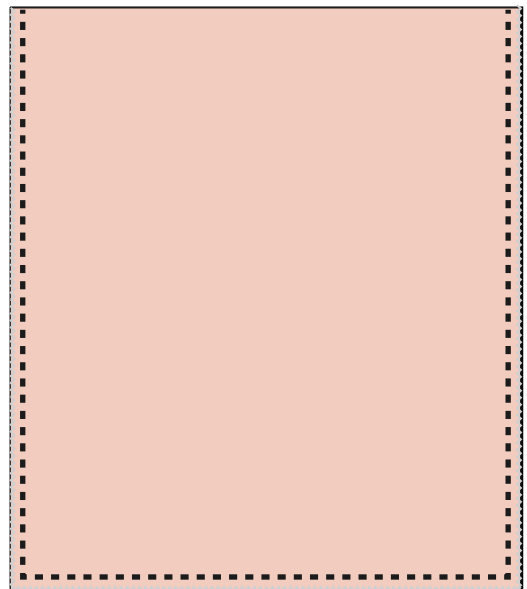

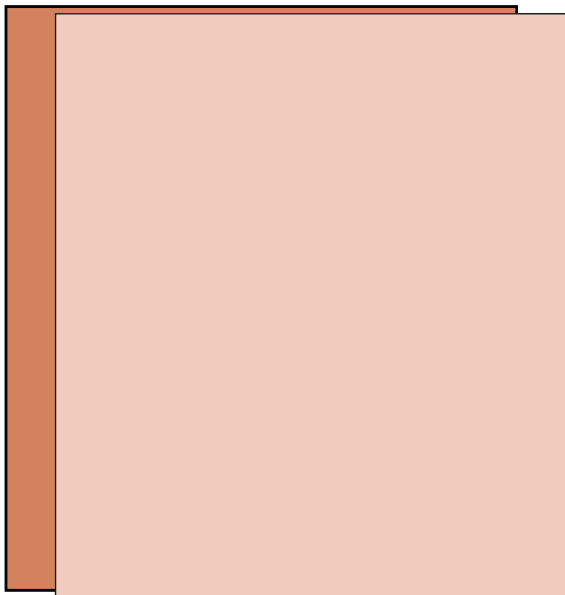

Start by laying the right sides of the fabric together.

****The right side is the side of the fabric you want to be visible at the end of the project.****

Sew around 3 sides of the bag at 1.25 cm seam allowance.

Then I like to zig-zag stitch those same 3 sides or use a serger if you have one.

 Right Side  Wrong Side

Step 02 • Sew the Bottom to Create Depth

Go to the bottom of the bag. **Pull the sides of the bag away from each other.**

You are trying to create a diamond/hexagon shape at the bottom.

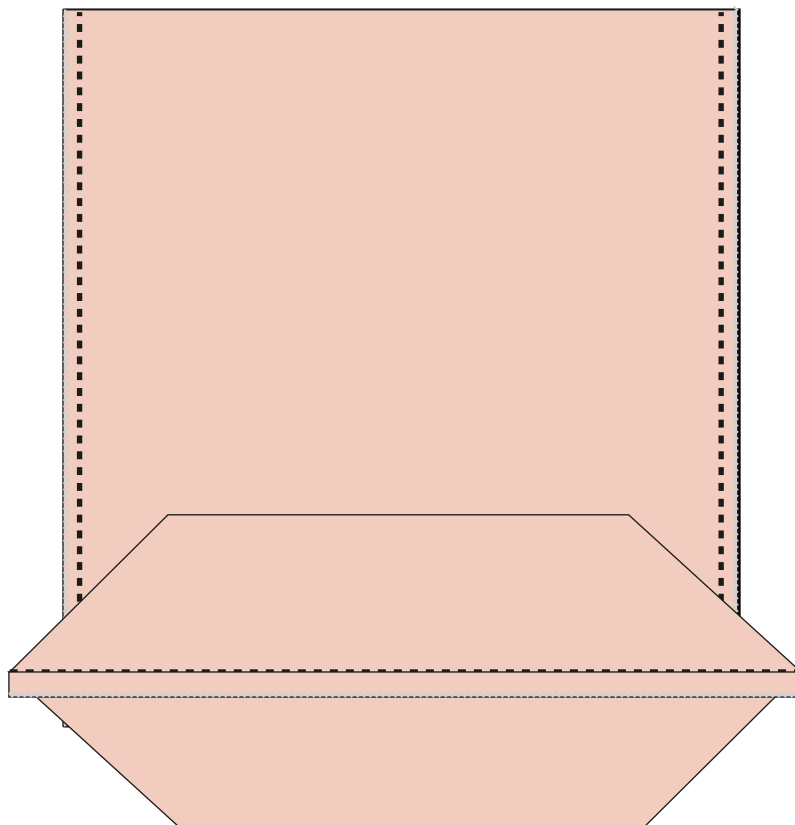

The front piece will touch itself. The back piece will fold on itself too.

The bottom seam will align with the side seam.

This is the trickiest part to describe. I have a video on how to make this bag, if you are more of visual learner.

My biggest tip is to wiggle the fabric and aim to create the shape below.

Then make sure all the **seams are laying in the same direction.**

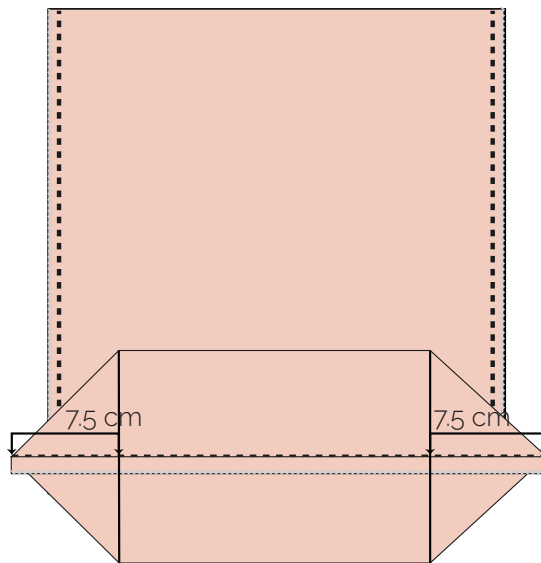

Step 03 • Sew the Bottom Corners and Trim

Measure 7.5 cm from the bottom corner.

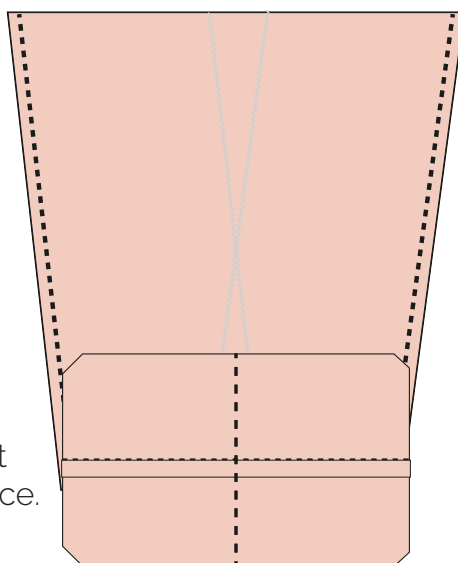

Then mark a straight line using chalk or a fabric marker.

Bring this over to your machine and sew along that line.

When you're finished trim the excess fabric 1.25 cm away from the line you've just sewn.

Trim off the excess fabric, but leave about 1.25 cm seam allowance.

Step 04 • Press and Sew the Arm Straps

You should have two strap pieces cut out.

Take one strap and fold it in half and press it with an iron.

Then, open it up again.

Now, fold one edge to the middle, making the strap into quarters.

Then repeat on the other edge. Fold it up to the middle crease.

Finally, fold the whole strap in half.

Now you can sew along the edge with a **65 mm seam allowance**.

Grab 1 strap.

Press the strap in half with an iron.

Open it up. Now there is a crease in the middle.

Take one edge and fold it to the middle. Creating quarters.

Repeat on the other side.

Fold the whole strap in half.

Sew along the edge. Use a 65 mm seam allowance.

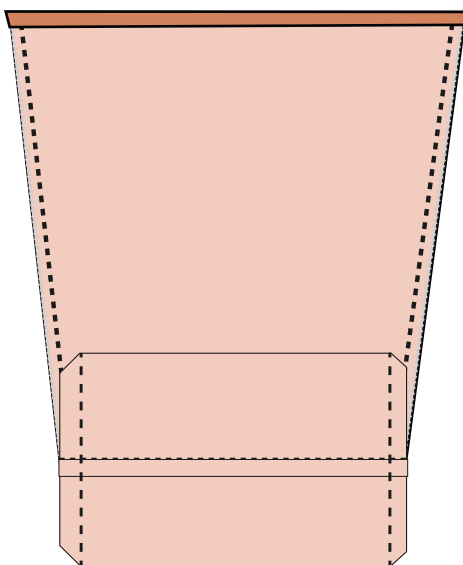

Step 05 • Press the Top Edge and Attach the Straps

Grab the bag and press the top edge down 1.25 cm and **then press it again another 1.25 cm.**

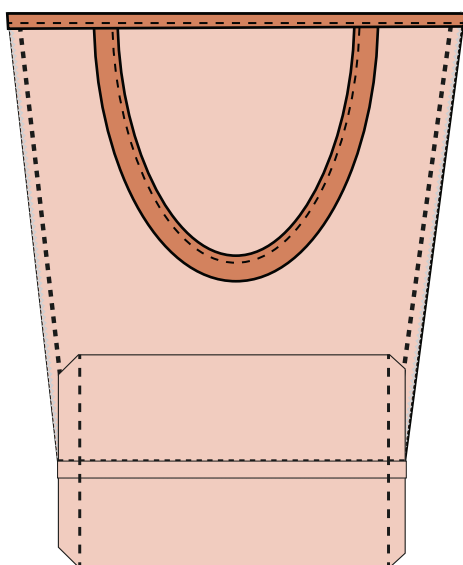

Now, find your two straps and place them between the folded down edge and the bag fabric.

The arc of the straps will be pointing toward the bottom of the bag.
I like to have the strap edge with the stitches pointing facing inward.
Then topstitch around the top edge.

Fold and press 2X

Place strap between folded edge and bag fabric. It should be pointing toward the bottom of the bag.

Step 06 • Flip the Strap Up and Stitch

Turn the bag **right sides out**.

Next, flip the straps up. So they look like an upside-down "U".

Then, sew an X to secure them in place.

Then you're ready to take your bag to the market.

I hope you're extremely proud of your work!
